RE: Gearon Civil Testimonial

The Regional Rail Link Footscray to Deer Park Alliance engaged Gearon Civil to deliver the widening and road duplication of Mount Derrimut Road and Tilburn Road in Deer Park.

The scope of works included earthworks, pavement construction, stormwater, traffic signalling and level crossing interface works to VicRoads specifications. The works involved complex staging to minimise the disruption to traffic and also work within the rail occupation schedule over the Christmas / New Year's holiday period (trains services were stopped during a 3-week period).

Gearon Civil successfully completed their scope of works within the required time and worked cooperatively with our team. The scope was generally delivered on-program and all of the quality documentation was also completed as promised.

I would recommend Gearon Civil for similar civil projects and look forward to working with them again in the future.

Regards,

Doug Talbott
Senior Project Engineer
