To whom it may concern,

**Melbourne Water Corporation Water Plan 3 Capital Program**

**RE: Gearon Civil Referral for Army Camp Retarding Basin Upgrade**

Leighton Black & Veatch (formerly Thiess Black & Veatch) engaged Gearon Civil to deliver the earthworks and civil works for Army Camp Retarding Basin Upgrade.

The works involved raising the crest height to new levels, installation of a crest filter trench through the embankment, reconditioning of the upstream embankment face and construction of a conduit filter diaphragm around some significant outlet conduits requiring significant temporary works due to the depth of excavation.

Gearon also completed the new internal access roads for use by the Melbourne Water maintenance team.

Gearon successfully completed the scope of works within the required time and worked cooperatively with our team. We were pleased with the overall management of the project and the documentation completed throughout the work is to be commended.

Both the Management team and site team involved in the Project approached site issues with a positive and above the line attitude.

I would recommend Gearon Civil for similar civil projects. It would be a pleasure to work with them again.

Yours sincerely,

**LEIGHTON CONTRACTORS BLACK & VEATCH JOINT VENTURE**

ED DUNCAN

**PROJECT MANAGER**
